

DTU is funding fossil fuels

To the students, staff and the rest of the world DTU pretends to fight the climate crisis. But with their investments, they fund the exact same companies that are causing the crisis.

We want an end to the destruction of nature and communities world wide, and a university we can be proud of. These investments must stop now.

WTF!?

We call for protest!

Stop funding fossil fuels

In 1992, 100 Nobel laureates said "We must move away from fossil fuels". Since then the UN climate panel has said that even current fossil fuel infrastructure, without new investments, is double of what it should be. Even the International Energy Agency has said that there can be no investments in fossil fuel infrastructure from now on.

And yet, in 2022 DTU is investing their money in companies that build fossil fuel infrastructure. DTU is making these investments in our name, and while pretending to take the climate emergency seriously. Working against the will and effort of so many students and staff to decarbonise society.

Business-as-usual is now causing droughts, forest fires, deadly heat, disease spread, crop failure and war. Continuing emissions will escalate all those consequences to civilization-threatening-scale.

DTUs investments in fossil fuels are a part of exactly this business-as-usual. Obviously then, part of the drastic response required in this emergency, must be for DTU to divest from fossil fuels and fund solutions instead.

**Join us in protest on 27 April at 12:00
in front of the main entrance of 101**
